

Hello,

My name is Matvii, and I am excited to apply for the Frontend position at your company. As a passionate and creative developer, I constantly seek professional growth and team collaboration. I have 1.5 years of experience in the Frontend field. My current stack is

**Client:** HTML/CSS/SASS/JS, React, TypeScript, Redux, Next.js, MUI;

**Server:** Node.js/Express;

I am eager to learn other frameworks, such as Vue/Angular/React Native, which makes me a strong candidate for this role. Also, my English proficiency is at the Advanced (C1) level.

In addition to my technical skills, I possess strong communication and analytical abilities and cultural adaptability. This was demonstrated during my participation in an exchange program and a year-long stay with a host family in the US.

Currently, I am looking for a Frontend job/internship (ready to work hourly / full-time).

I am confident that my skills and experience align with the requirements of this role, and I would be a valuable asset to your team. I attached my resume, and you can reach out to me by email: [matviy.kharchenko@gmail.com](mailto:matviy.kharchenko@gmail.com).

I would love to participate in an online interview, including a test task and live-coding session.

Sincerely,  
Matvii Kharchenko
